

# Quality and Environmental Policy

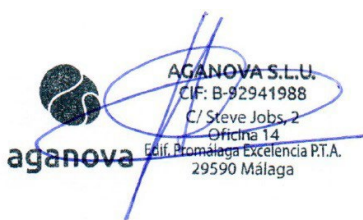

Aganova is specialized in water leak detection in distribution and transportation networks. We develop and offer solutions worldwide to reduce water losses in large-diameter networks.

Our mission is to provide profitable, efficient, and effective technologies with a recurring use model that helps minimize Non-Revenue Water (NRW) while offering our clients valuable decision-making information.

We are committed to offering a high-quality service that addresses our customers' needs in a sustainable manner and minimizing our impact in the environment. By implementing an integrated Quality and Environmental Management System following international standards UNE-EN ISO 9001:2015 and 14001:2015 Aganova aims to spread the following objectives and principles:

- To satisfy our customers' needs by offering innovative solutions that contribute to
- minimize Non-Revenue Water.
- To communicate and encourage our employees to fulfill organizational goals taking into
- consideration legal requirements and stakeholders' interests.
- To promote continuous improvement in our processes.
- To train and empower our employees by developing training programs.
- To offer safe working conditions being aligned to Health and Safety standards.
- To contribute to the protection of the environment by correctly managing waste as well as
- raising awareness on reducing Non-Revenue Water.

Aganova SLU,
